Whether you're a beginner or a pro with years of experience you'll improve your work and your career with the simple and straightforward principles in *The Productive Programmer* — *Ultralearning* Scott Young, 2019-08-06. Now a Wall Street Journal bestseller. Learn a new talent, stay relevant, reinvent yourself and adapt to whatever the workplace throws your way. Ultralearning offers nine principles to master hard skills quickly. This is the essential guide to future proof your career and maximize your competitive advantage through self education. In these tumultuous times of economic and technological change staying ahead depends on continual self education, a lifelong mastery of fresh ideas, subjects and skills. If you want to accomplish more and stand apart from everyone else you need to become an ultralearner. The challenge of learning new skills is that you think you already know how best to learn as you did as a student so you rerun old routines and old ways of solving problems. To counter that Ultralearning offers powerful strategies to break you out of those mental ruts and introduces new training methods to help you push through to higher levels of retention. Scott H Young incorporates the latest research about the most effective learning methods and the stories of other ultralearners like himself among them Benjamin Franklin chess grandmaster Judit Polgar and Nobel laureate physicist Richard Feynman as well as a host of others such as little known modern polymath Nigel Richards who won the French World Scrabble Championship without knowing French. Young documents the methods he and others have used to acquire knowledge and shows that far from being an obscure skill limited to aggressive autodidacts ultralearning is a powerful tool anyone can use to improve their career, studies and life. Ultralearning explores this fascinating subculture, shares a proven framework for a successful ultralearning project and offers insights into how you can organize and execute a plan to learn anything deeply and quickly without teachers or budget busting tuition costs. Whether the goal is to be fluent in a language or ten languages, earn the equivalent of a college degree in a fraction of the time or master multiple tools to build a product or business from the ground up the principles in Ultralearning will guide you to success. — *Elements of Programming Interviews* Adnan Aziz, Tsung-Hsien Lee, Amit Prakash, 2012. The problems are representative of questions asked at the leading software companies. The book begins with a summary of the nontechnical aspects of interviewing such as common mistakes, strategies for a great interview, perspectives from the other side of the table, tips on negotiating the best offer and a guide to the best ways to use EPI.
