**ICD-10-CM Official Guidelines for Coding and Reporting - FY 2021 (October 1, 2020 - September 30, 2021)**

Department Of Health And Human Services,2020-09-06 These guidelines have been approved by the four organizations that make up the Cooperating Parties for the ICD-10-CM: the American Hospital Association (AHA), the American Health Information Management Association (AHIMA), CMS, and NCHS. These guidelines are a set of rules that have been developed to accompany and complement the official conventions and instructions provided within the ICD-10-CM itself. The instructions and conventions of the classification take precedence over guidelines. These guidelines are based on the coding and sequencing instructions in the Tabular List and Alphabetic Index of ICD-10-CM, but provide additional instruction. Adherence to these guidelines when assigning ICD-10-CM diagnosis codes is required under the Health Insurance Portability and Accountability Act (HIPAA). The diagnosis codes (Tabular List and Alphabetic Index) have been adopted under HIPAA for all healthcare settings. A joint effort between the healthcare provider and the coder is essential to achieve complete and accurate documentation, code assignment, and reporting of diagnoses and procedures. These guidelines have been developed to assist both the healthcare provider and the coder in identifying those diagnoses that are to be reported. The importance of consistent, complete documentation in the medical record cannot be overemphasized. Without such documentation accurate coding cannot be achieved. The entire record should be reviewed to determine the specific reason for the encounter and the conditions treated.

*CPT Handbook for Psychiatrists* Chester W. Schmidt,Rebecca Yowell,Ellen Jaffe,2004 Proper coding and documentation are vital to getting paid, especially in today's healthcare environment, yet specific information on coding for mental health services is often difficult to find. The third edition of this concise, easy-to-read handbook offers the essential reference for mental health professionals. Marking more than a decade of experience, this practical handbook represents the collective wisdom of the APA's Committee on RBRVS, Codes, and Reimbursements and covers changes mandated by the Health Insurance Portability and Accountability Act (HIPAA) and changes in the way psychiatry is currently practiced and documented. In just 8 chapters and a remarkable 12 appendixes and index, the authors explain the structure and function of CPT and how to use and document codes for initial evaluations, psychotherapy, medication management, and other services listed in the psychiatry section of CPT. This edition has expanded information on the evaluation and management (E/M) codes and includes vignettes and documentation templates to guide physicians and other providers on how to code and document these medical services. As the struggle for appropriate reimbursement continues--with payers often using the technicalities of coding and documentation to reduce or deny payment--this practical volume offers a lifeline for mental health professionals everywhere.

**The Primary Care Toolkit** Larry James,William O'Donohue,2008-11-01 Integrated care is receiving a lot of attention from clinicians, administrators, policy makers, and researchers. Given the current healthcare crises in the United States, where costs, quality, and access to care are of particular concern, many are looking for new and better ways of delivering behavioral health services. Integrating behavioral health into primary care medical settings has been shown to: (1) produce healthier patients; (2) produce medical savings; (3) produce higher patient satisfaction; (4) leverage the primary care physician's time so that they can be more productive; and (5) increase physician satisfaction. For these reasons this is an emerging paradigm with a lot of interest and momentum. For example, the President's New Freedom Commission on Mental Health has recently endorsed redesigning the mental health system so that much of this is integrated into primary care medicine.
