Building the Case for Health Literacy National Academies of Sciences, Engineering, and Medicine,Health and Medicine Division,Board on Population Health and Public Health Practice,Roundtable on Health Literacy,2018-08-26 The field of health literacy has evolved from one focused on individuals to one that recognizes that health literacy is multidimensional. While communicating in a health literate manner is important for everyone, it is particularly important when communicating with those with limited health literacy who also experience more serious medication errors, higher rates of hospitalization and use of the emergency room, poor health outcomes, and increased mortality. Over the past decade, research has shown that health literacy interventions can significantly impact various areas including health care costs, outcomes, and health disparities. To understand the extent to which health literacy has been shown to be effective at contributing to the Quadruple Aim of improving the health of communities, providing better care, providing affordable care, and improving the experience of the health care team, the National Academies of Sciences, Engineering, and Medicine convened a public workshop on building the case for health literacy. This publication summarizes the presentations and discussions from the workshop, and highlights important lessons about the role of health literacy in meeting the Quadruple Aim, case studies of organizations that have adopted health literacy, and discussions among the different stakeholders involved in making the case for health literacy.

Statin-Associated Muscle Symptoms Paul D. Thompson,Beth A. Taylor,2020-01-25 This book provides an overview of statin-associated muscle symptoms (SAMS) from clinical presentation to treatment and possible metabolic causes. It examines the risk factors, presentations, diagnosis and differential diagnosis, clinical management, and financial costs of SAMS. The book also highlights patients' perspectives on SAMS such as the psychosocial, emotional, and societal factors influencing their perceptions and experiences. Finally, the book presents the results of observational and clinical trials on the prevalence of SAMS, clinical trials for treatments, and potential future research approaches for improving the understanding and treatment of SAMS. A key addition to the Contemporary Cardiology series, *Statin-Associated Muscle Symptoms* is an essential resource for physicians, medical students, residents, fellows, and allied health professionals in cardiology, endocrinology, pharmacotherapy, primary care, and health promotion and disease prevention.

Hepatotoxicity Hyman J. Zimmerman, 1999 Written by the foremost authority in the field, this volume is a comprehensive review of the multifaceted phenomenon of hepatotoxicity. Dr. Zimmerman examines the interface between chemicals and the liver; the latest research in experimental hepatotoxicology; the hepatotoxic risks of household, industrial, and environmental chemicals; and the adverse effects of drugs on the liver. This thoroughly revised, updated Second Edition features a greatly expanded section on the wide variety of drugs that can cause liver injury. For quick reference, an appendix lists these medications and their associated hepatic injuries. Also included are in-depth discussions of drug metabolism and factors affecting susceptibility to liver injury.

The Case for Marriage Linda Waite, Maggie Gallagher, 2002-03-05 A groundbreaking look at marriage, one of the most basic and universal of all human institutions, which reveals the emotional, physical, economic, and sexual benefits that marriage brings to individuals and society as a whole. The Case for Marriage is a critically important intervention in the national debate about the future of family. Based on the authoritative research of family sociologist Linda J. Waite, journalist Maggie Gallagher, and a number of other scholars, this book's findings dramatically contradict the anti-marriage myths that have become the common sense of most Americans. Today a broad consensus holds that marriage is a bad deal for women, that divorce is better for children when parents are unhappy, and that marriage is essentially a private choice, not a public institution. Waite and Gallagher flatly contradict these assumptions, arguing instead that by a broad range of indices, marriage is actually better for you than being single or divorced- physically, materially, and spiritually. They contend that married people live longer, have better health, earn more money, accumulate more wealth, feel more fulfillment in their lives, enjoy more satisfying sexual relationships, and have happier and more successful children than those who remain single, cohabit, or get divorced. The Case for Marriage combines clearheaded analysis, penetrating cultural criticism, and practical advice for strengthening the institution of marriage, and provides clear, essential guidelines for reestablishing marriage as

the foundation for a healthy and happy society. “A compelling defense of a sacred union. The Case for Marriage is well written and well argued, empirically rigorous and learned, practical and commonsensical.” -- William J. Bennett, author of *The Book of Virtues* “Makes the absolutely critical point that marriage has been misrepresented and misunderstood.” -- *The Wall Street Journal* www.broadwaybooks.com

Outcomes Measures in Plastic Surgery, An Issue of Clinics in Plastic Surgery, Kevin C. Chung,Andrea L Pusic,2013-04-05

Outcomes . . .familiar in medicine fields, but only in recent decades becoming more of an issue for surgeons . . .the highly subspecialized nature of the surgical profession and breadth of procedures along with variance in patient population creates a challenge in achieving useful, informative outcomes. Here, in this issue of *Clinics in Plastic Surgery*, the focus is on evidence-based practice and outcomes in plastic surgery, spanning the major areas of cosmetic and reconstructive surgery. Outcomes as guidance for the surgeon’s decision regarding approaches and techniques for procedures is the approach. Some of the topics covered are: *Measuring Outcomes in Aesthetic Surgery; Measuring Outcomes in Craniofacial and Pediatric Surgery; Measuring Outcomes in Hand Surgery; How to Link Outcomes Data to Quality Initiatives in Plastic Surgery;* along with *How to Use the Outcomes Questionnaire, Pearls and Pitfalls;* among others. Guest Editors Kevin Chung and Andrea Pusic lead this review. Dr. Chung is involved with structuring evidence-based practice and research in hand surgery to derive the best evidence to guide treatment for upper extremity conditions and he developed the Michigan Hand Outcomes Questionnaire. Dr Pusic developed the BREAST-Q, which measures satisfaction and quality-of-life outcomes among breast reconstruction patients. Out of the BREAST-Q has come the FACE-Q, which provides a clinically useful patient-reported outcome measure of satisfaction and quality of life following elective surgical and non-surgical facial rejuvenation.

Integrating Behavioral Health and Primary Care Dr. Robert Feinstein,Dr. Joseph Connelly,Marilyn Feinstein,2017-04-13 Integrated care incorporates behavioral and physical health services into primary care and specialty medical environments. Integrated care models are patient-centered; delivered by teams of medical professionals, utilize care coordination, and a population-based approach. This book is practical, office-based, and comfortably accessible to students, residents, faculty, and all mental health professionals, primary care and medical specialists. We examine and recommend applying collaborative care and other existing models of integrated care based on existing literature. When there is no literature supporting a specific approach, our experts offer their ideas and take an aspirational approach about how to manage and treat specific behavioral disorder or problems We assume the use of integrated team staffing including a primary care or specialist provider(s), front desk staff, medical assistant(s), nurse(s), nurse practitioners, behavioral health specialist(s), health coaches, consulting psychiatrist, and care coordinator(s)/manager(s).

Current Advances for Development of Functional Foods Modulating Inflammation and Oxidative Stress Blanca Hernandez-Ledesma, Cristina Martinez-Villaluenga, 2021-12-03 *Current Advances for Development of Functional Foods Modulating Inflammation and Oxidative Stress* presents the nutritional and technological aspects related to the development of functional foods with anti-inflammatory and antioxidant effects. Specifically, analytical approaches for the characterization of anti-inflammatory and antioxidant properties of healthy foods and functional constituents, as well as technological strategies for the extraction of compounds and fractions from raw materials to produce anti-inflammatory and antioxidant ingredients are addressed. In addition, the molecular mechanisms by which foods and their components can modulate inflammation and their oxidative stress effects on disease prevention are explored. Finally, clinical research addressing nutritional needs in pathological subjects with inflammatory diseases are considered. Covers methods of analysis and extraction of anti-inflammatory and antioxidant compounds Offers an overview of the main anti-inflammatory and antioxidant compounds in foods Provides a guide on the mechanisms of action and health benefits of anti-inflammatory and antioxidant dietary bioactives

Chocolate and Health: Friend or Foe? Mauro Serafini, Emilio Jirillo, 2018-02-15 In the ancient past, cocoa has been appreciated as a high-calorie food to boost energy in soldiers and for its undefined medicinal and mystical properties. During other times, chocolate has been considered as the forbidden “food of God”: a treasure of pleasure for the mind and the soul. The overall perception of the consumer for chocolate was of a “charming” and appealing food with lots of negative aspects related to high sugar content leading to consider chocolate as “junk food” for its “obesigen” calories. Recently, in association with the renewed interest of nutrition science in alternative source of health-promoting foods and ingredients, a large body of research has been conducted to unravel the pro and cons of cocoa in relation to human health. Epidemiological evidences indicate that cocoa consumption helps preventing cardiovascular disease for its high content in bioactive flavonoids. Clinical trials show that chocolate consumption might improve vascular function, decreasing platelet aggregation and display an antioxidant and anti-inflammatory effect. The putative protective action of cocoa seems to be multi-factorial and involving

different aspects of vascular, antioxidant and endothelial function. However, the mechanism(s) that account for the benefits of cocoa it is still unclear. The aim of this Research Topic is therefore to provide the reader with an objective picture of the state of art on the association between cocoa and health, mainly through the evidences of human trials; overwhelmingly considered the golden standard for nutritional science. The Research Topic will cover the analysis of the manufacturing processes of the chocolate and the antioxidant effects in humans as well as the majority of the putative health effects of chocolate and cocoa, such as anti-inflammatory properties, effect on immunity, platelet aggregation, blood pressure, endothelial function and cognitive behavior. Unraveling the functional properties of cocoa will help to understand if the 'food of God' is a primordial gift for the health of mankind.
