Mariano Velázquez de la Cadena

Measures of Health Literacy Institute of Medicine, Board on Population Health and Public Health Practice, Roundtable on Health Literacy, 2009-12-30 Health literacy—the ability for individuals to obtain, process, and understand basic health information and services to facilitate appropriate health decisions—is increasingly recognized as an important facet of health care and health outcomes. Although research on health literacy has grown tremendously in the past decade, there is no widely agreed-upon framework for health literacy as a determinant of health outcomes. Most instruments focus on assessing an individual's health literacy, yet the scope of health literacy reaches far beyond an individual's skills and abilities. Health literacy occurs in the context of the health care system, and therefore measures of health literacy must also assess the demands and complexities of the health care systems with which patients interact. For example, measures are needed to determine how well the system has been organized so that it can be navigated by individuals with different levels of health literacy and how well health organizations are doing at making health information understandable and actionable. To examine what is known about measures of health literacy, the Institute of Medicine convened a workshop. The workshop, summarized in this volume, reviews the current status of measures of health literacy, including those used in the health care setting; discusses possible surrogate measures that might be used to assess health literacy; and explores ways in which health literacy measures can be used to assess patient-centered approaches to care.

Directory of Nursing Homes 2001 Hcia, 2001 Facilities listed by state.

The CNT in the Spanish Revolution José Peirats, 2001 The most detailed history to date of the million-strong revolutionary trade union, the CNT, and of its grassroots supporters who, in July 1936, embarked upon the most far-reaching of all 20th century revolutionary experiments. It is the history of the giddy years of political change and hope in 1930s Spain, when the so-called 'Generation of 36,' Peirats's own generation, rose up against the oppressive structures of Spanish society. It is also a history of a revolution that failed, crushed in the jaws of its enemies on both the democratic-left and the reactionary right. Containing a bounty of original documents produced by the trade unions, revolutionary assemblies and rural and industrial collectives of the 1930s, many of which are unavailable elsewhere, and all translated into English for the first time, Peirats explores the new social, economic and cultural arrangements that were introduced in the streets, fields and factories of

republican Spain. A staggering work - fully indexed and footnoted, with 20 pages of photographs. Superlatives like mandatory and monumental really fail to do this justice. A vital book about a crucial era in history.

An Introductory Guide to EC Competition Law and Practice Valentine Korah,1994

Textbook for Transcultural Health Care: A Population Approach Larry D. Purnell,Eric A. Fenkl,2020-09-05 This textbook is the new edition of Purnell's famous Transcultural Health Care, based on the Purnell twelve-step model and theory of cultural competence. This textbook, an extended version of the recently published Handbook, focuses on specific populations and provides the most recent research and evidence in the field. This new updated edition discusses individual competences and evidence-based practices as well as international standards, organizational cultural competence, and perspectives on health care in a global context. The individual chapters present selected populations, offering a balance of collectivistic and individualistic cultures. Featuring a uniquely comprehensive assessment guide, it is the only book that provides a complete profile of a population group across clinical practice settings. Further, it includes a personal understanding of the traditions and customs of society, offering all health professionals a unique perspective on the implications for patient care.

Encyclopedia of Immigrant Health Sana Loue,Martha Sajatovic,2014-06-20 There is increasing interest in the scientific literature on immigrant health and its impact on disease transmission, disease prevention, health promotion, well-being on an individual and population level, health policy, and the cost of managing all these issues on an individual, institutional, national, and global level. The need for accurate and up-to-date information is particularly acute due to the increasing numbers of immigrants and refugees worldwide as the result of natural disasters, political turmoil, the growing numbers of immigrants to magnet countries, and the increasing costs of associated health care that are being felt by governments around the world. Format and Scope: The first portion of the encyclopedia contains chapters that are approximately 25 to 40 manuscript pages in length. Each overview chapter includes a list of references and suggested readings for cross referencing within the encyclopedia. The opening chapters are: Immigration in the Global Context, Immigration Processes and Health in the U.S.: A Brief History, Alternative and Complementary Medicine, Culture-Specific Diagnoses, Health Determinants, Occupational and Environmental Health, Methodological Issues in Immigrant Health Research, Ethical Issues in Research with Immigrants and Refugees, Ethical Issues in the Clinical Context. The second portion of the book consists of alphabetical entries that relate to the health of immigrants. Entries are interdisciplinary and are drawn from the following fields of study: anthropology, demographics, history, law, linguistics, medicine, population studies, psychology, religion, and sociology. Each entry is followed by a listing of suggested readings and suggested resources, and also links to related terms within the whole book. Outstanding Features The book adopts a biopsychosocial-historical approach to the topics covered in the chapters and the entries. Each entry includes suggested readings and suggested resources. The chapters and entries are written graduate level that is accessible to all academics, researchers, and professionals from diverse backgrounds. We consider the audience for the entries to be well educated, but a non expert in this area. The primary focus of the book is on the immigrant populations in and immigration to magnet countries. References are made to worldwide trends and issues arising globally. In addition to the comprehensive subject coverage the text also offers diverse perspectives. The editors themselves reflect the multidisciplinary nature of the topics, with expertise in psychiatry, law, epidemiology, anthropology, and social work. Authors similarly reflect diverse disciplines.

Ruminations: Selected Philosophical, Historical, and Ideological Papers, Volume 1, Part 2. The Finite Eric v.d. Luft,2020-09-13 Since the 1970s I have pursued three separate but overlapping and sometimes simultaneous careers: (1) philosopher / writer / teacher / historian of the long nineteenth century, 1789-1914; (2) editor / translator / photographer / publisher / biographer / encyclopedist; (3) cataloging librarian / rare books and special collections librarian / historian of medicine. Somehow these three vocations have garnered me some acclaim, even an entry in Who's Who in America. Each of them has resulted in some published or presented works. Because these works have been scattered in a wide variety of venues, some of which have gone out of print or have otherwise become generally unavailable - and of course with the oral

presentations being gone as soon as they are given - I have thought it wise to select, epitomize, and bring them together in one place - here. Thus, what follows in these volumes is what I consider to be the most important of my shorter works. All translations are my own unless otherwise indicated.
