Handbook of Multicultural Mental Health Freddy A. Paniagua,2000-06-05
Clinicians and mental health practitioners are regularly called upon to treat patients of diverse cultural and ethnic backgrounds. Not only do these patients differ from Anglos in culture and language, but also in customs, beliefs, values, and practices. Understanding these differences is vital to performing an accurate diagnosis/assessment of psychopathology as well as in determining an effective treatment regimen. This book provides vital information to clinicians worldwide in bettering their treatment of diverse populations. Each chapter identifies relevant cultural variables specific to each racial/ethnic group, along with ethnocultural measures and their relevant psychometric properties. Part 1 presents introductory material on the definition of mental illness and pathological

behavior in differing cultures, epidemiological data on the prevalence of different disorders between differing population groups, culture specific beliefs (e.g. hexes), and the influence of culture on treatment. Part 2 discusses assessment issues including how specific measures (Rorschach, MMPI, etc.) are best interpreted with different population groups, and the existence and use of ethnocultural specific measures. Part 3 discusses assessment and treatment of specific population groups (e.g., Indians, Asians, Latinos, etc.).

College Psychiatry Michelle B. Riba,Meera Menon,2021-05-29 This book explores the practical strategies outlined by national thought leaders to improve access to mental health care in the practice of college psychiatry. It addresses the escalating need for mental health services on college and university campuses. Concise yet comprehensive, the book considers the college experience for the increasingly diverse student body, including non-traditional college students, first-generation college students, and students with a history of mental illness. Beginning with a discussion on the current national health trends in college mental health, chapter one explores the current epidemiology of student mental health problems, the systemic challenges in recruitment, and funding psychiatric services. Subsequent chapters then delve into the various systems and models of psychiatric care for college students, including differing parental involvement levels and the importance of collaborative care to short term management and referral of students at risk. Chapters five and six examine mental health considerations for LGBTQ, Black, Indigenous, and People of Color students. Further chapters analyze the critical nature of successfully navigating a leave of absence, as well as the consideration of threat assessment on college campuses. The book closes with a highly relevant evaluation of telemental health and telepsychiatry in the College Setting as it pertains to the ongoing barriers to care caused by COVID-19. Socially conscious and timely, College Psychiatry is an indispensable text for all mental health professionals.

PAS-ADD Clinical Interview Steve Moss, Robin Friedlander, 2011 The PAS-ADD clinical interview has been designed to meet the particular problems of assessment in people with intellectual disability (mental retardation), but is equally valid for use with the general population. It provides full diagnoses under both ICD 10 and DSM IV(TR), and also provides a framework for producing a wider case formulation using other assessment frameworks, behavioural, ecological, psychodynamic etc. The interview is designed to maximise the possibility of conducting a clinical interview, even if the client's level of language is poor. Questions are also provided for informants, so that the interviews can be conducted with a client and informant, or just with an informant if the client is non-verbal . Information can be collected, not just on current mental state, but also on a second representative episode. The interview provides full diagnoses under both ICD 10 and DSM IV(TR), including: ICD 10 Agoraphobia Social phobia Specific phobia Panic disorder Generalized anxiety disorder Obsessive compulsive disorder Depressive episode Depressive episode with psychotic features Manic episode Manic episode with psychotic features Schizophrenia Other non-organic psychosis Other persistent delusional disorder Delusional disorder Psychosis unspecified Autistic Spectrum Disorder* *Screening only DSM IV (TR) Agoraphobia Social phobia Specific phobia Panic disorder Generalized anxiety disorder Obsessive compulsive disorder Depressive episode Depressive episode with psychotic features Manic episode Manic episode with psychotic features Schizophrenia Schizophreniform disorder Delusional disorder Psychotic disorder NOS Brief psychotic disorder ADHD Autistic Spectrum Disorder* The PAS-ADD clinical interview uses a scoring system that is transparent to the user, making it very clear to see not just the criteria that have been fulfilled

but also those that are close to fulfilment. This makes the process of clinical interpretation easier and based on clear evidence. There are two parts to the PAS-ADD Clinical Interview The handbook, which includes guidance to the user, notes on the diagnostic algorithms, and the semi-structured interview 1.
