Difficult Decisions in Thoracic Surgery Mark K. Ferguson,2007-03-12 This book describes the recommended ideal approach, rather than customary care, in selected clinical situations. Brief chapters are devoted to a specific question or decision in general thoracic surgery that is difficult or controversial. The chapters contain both evidence-based recommendations and descriptions of surgeons' personal practices. Chapters are organized around clearly identified recommendations, making possible the identification of useful material at a glance. Over 50 different topics are presented. This book is a valuable reference source for practicing surgeons, surgeons in training, and educators.

Handbook of Consumer Finance Research Jing Jian Xiao,2016-05-30 This second edition of the authoritative resource summarizes the state of consumer finance research across disciplines for expert findings on—and strategies for enhancing—consumers' economic health. New and revised chapters offer current research insights into familiar concepts (retirement saving, bankruptcy, marriage and finance) as well as the latest findings in emerging areas, including healthcare costs, online shopping, financial therapy, and the neuroscience behind buyer behavior. The expanded coverage also reviews economic challenges of diverse populations such as ethnic groups, youth, older adults, and entrepreneurs, reflecting the ubiquity of monetary issues and concerns. Underlying all chapters is the increasing importance of financial literacy training and other large-scale interventions in an era of economic transition. Among the topics covered: Consumer financial capability and well-being. Advancing financial literacy education using a framework for evaluation. Financial coaching: defining an emerging field. Consumer finance of low-income families. Financial parenting: promoting financial self-reliance of young consumers. Financial sustainability and personal finance education. Accessibly written for researchers and practitioners, this Second Edition of the Handbook of Consumer Finance Research will interest professionals involved in improving consumers' fiscal competence. It also makes a worthwhile text for graduate and advanced undergraduate courses in economics, family and consumer studies, and related fields.

Risk Management Maturity Sylwia Bąk,Piotr Jedynak,2022-10-04 Crises like the COVID-19 pandemic are wake-up calls for enterprises to review their current risk management models. This book suggests a more robust risk management maturity

model and illustrates the application in crisis situations. The book surveys existing risk management maturity models and proposes a new model appropriate for assessing the risk management processes in enterprises during times of crisis. Its key advantages include the correlation of its attributes with crisis situations and an innovative methodological approach to model development. The authors use the model to examine 107 enterprises from the financial services, construction and IT sector, showing how it allows the user to identify risk management maturity changes in the aftermath of the COVID-19 pandemic. The book will interest entrepreneurs, managers and risk management professionals, who can use the model in their management processes, as well as enterprise stakeholders and academics. The Open Access version of this book, available at www.taylorfrancis.com, has been made available under a Creative Commons Attribution- Non Commercial-No Derivatives 4.0 license.

Research Methods, Statistics, and Applications Kathryn A. Adams, Eva K. Lawrence, 2018-02-26 One of the greatest strengths of this text is the consistent integration of research methods and statistics so that students can better understand how the research process requires the combination of these elements. The end goal is to spark students' interest in conducting research and to increase their ability to critically analyze it. In the new second edition of the text, Katherine Adams and Eva Lawrence have integrated additional information on online data collection and research methods, additional coverage of regression and ANOVA, and new examples to engage students.

Assessing Risk Assessment Christian Hugo Hoffmann, 2017-11-14 Christian Hugo Hoffmann undermines the citadel of risk assessment and management, arguing that classical probability theory is not an adequate foundation for modeling systemic and extreme risk in complex financial systems. He proposes a new class of models which focus on the knowledge dimension by precisely describing market participants' own positions and their propensity to react to outside changes. The author closes his thesis by a synthetical reflection on methods and elaborates on the meaning of decision-making competency in a risk management context in banking. By choosing this poly-dimensional approach, the purpose of his work is to explore shortcomings of risk management approaches of financial institutions and to point out how they might be overcome.

Trends in Emerging Markets Finance, Institutions and Money Duc Khuong Nguyen ,Stéphane Goutte, 2020-12-02 Since the waves of financial liberalization in the 1980s, emerging market economies have been accessible to foreign investors. Altogether, they contributed up to 43.8% of the global GDP in 2018, and many of them, such as China, India, Bangladesh, Philippines, Myanmar and Vietnam from 2010 to 2019, are among the fastest-growing economies in the world. Given the high economic growth, the assets issued by companies in emerging markets are viewed as a new set of investment opportunities for global investors and fund managers who seek to improve the risk-adjusted performance of their portfolios. In addition to their risky profile due to the lack of transparency as well as stable and matured institutions, their recent development path faces a number of challenges arising not only from the slow pace of economic reforms but also from their

increased integration with the world. Geopolitical risks, the US-China trade wars, and rising policy uncertainty around the world are expected to reduce their growth potential and performance. This Special Issue dedicates special attention to the current dynamics of emerging financial markets, as well as their perspectives of development as a key driver for sustainable firms and economies. Accordingly, the focus is particularly placed on market integration and interdependence, valuations and risk management practices, and the financing means for inclusive growth.

Financial Whirlpools Karen L. Higgins, 2013-03-26 How do economists reconcile their expertise with their failures to predict and manage the 2008 financial crisis? This book goes a long way toward an answer by using systems theory to reveal the complex interdependence of factors and forces behind the crisis. In her fully integrated view of the economy, how it works, and how the economic crisis burst, Karen Higgins combines human psychology, cultural values, and belief formation with descriptions of the ways banks and markets succeed and fail. In each chapter she introduces themes from financial crisis literature and brings a systems-theory treatment of them. Her methodology and visual presentations both develop the tools of systems theory and apply these tools to the financial crisis. Not just another volume about the crisis, this book challenges the status quo through its unique multidisciplinary approach. Presents a broad global view of international economic health and international corporate health Describes how policies, regulations, and trends dating to the 1950s influenced the crisis Assumes readers possess a general familiarity of economics and finance

Assessing Risk to the National Critical Functions as a Result of Climate Change Michelle E. Miro, Andrew Lauand, Rahim Ali, Edward W. Chan, Richard H. Donohue, Ecola, Timothy R. Gulden, Liam Regan, Karen M. Sudkamp, Tobias Sytsma, Michael T. Wilson, Chandler Sachs, 2022-04-05 National Critical Functions (NCFs) are government and private-sector functions so vital that their disruption would debilitate security, the economy, public health, or safety. Researchers developed a risk management framework to assess and manage the risk that climate change poses to the NCFs and use the framework to assess 27 priority NCFs. This report details the risk assessment portions of the framework.

Handbook of Consumer Finance Research Jing J. Xiao, 2008-01-03 This handbook surveys the social aspects of consumer behavior, offering latest data and original research on current consumer needs as well as identifying emerging areas of research. This accessible volume (which can be read without advanced training in the field) starts with current concepts of risk tolerance, consumer socialization, and financial well-being, and moves on to salient data on specific settings and populations such as high school students and the older consumer.

Research Handbook on International Banking and Governance James R. Barth, Dr. Chen Lin, Clas

Wihlborg,2012-01-01 The recent financial crisis has stimulated much debate on the governance of financial institutions, as well as research on the effects of governance arrangements on risk-taking, performance and financial institutions more generally. Furthermore, researchers are asking how regulation, legislation, politics and other factors influence the governance of financial institutions and their behavior in different dimensions. The specially commissioned contributions featured in this timely Handbook confront these complex issues. The contributors - top international scholars from finance, law and business - explore the role of governance, both internal and external, in explaining risk-taking and other aspects of the behavior of financial institutions. Additionally, they discuss market and policy features affecting objectives and quality of governance. The chapters provide in-depth analysis of factors such as: ownership, efficiency and stability; market discipline; compensation and performance; social responsibility; and governance in non-bank financial institutions. Only through this kind of rigorous examination can one hope to implement the financial reforms necessary and sufficient to reduce the likelihood and severity of future crises. Bringing the reader to the frontier of research on governance of financial institutions, this volume is sure to inspire future research in scholars and students of financial institutions, governance and banking as well as all those involved with private financial institutions and public regulatory and supervisory authorities.

Behavior-Based Assessment in Psychology Tuulia M Ortner,Fons J. R. van de Vijver,2015-07-06 An authoritative volume discussing the most influential state-of-the-art behavior-based alternatives to traditional self-reports in psychological assessment Traditional self-reports can be an insufficient source of information about personality, attitudes, affect, and motivation. What are the alternatives? This first volume in the authoritative series Psychological Assessment - Science and Practice discusses the most influential, state-of-the-art forms of assessment that can take us beyond self-report. Leading scholars from various countries describe the theoretical background and psychometric properties of alternatives to self-report, including behavior-based assessment, observational methods, innovative computerized procedures, indirect assessments, projective techniques, and narrative reports. They also look at the validity and practical application of such forms of assessment in domains as diverse as health, forensic, clinical, and consumer psychology.
